Summary

Software Engineer with 6 years of experience, specializing in React and TypeScript. I've built scalable frontend architectures across diverse industries like finance, AI, healthcare, and communication, delivering top-notch software to thousands of users. I thrive on solving real-world problems with an analytical and creative approach, elevating businesses to new heights. Passionate about optimizing code to enhance user experiences, I value collaboration and communication, bringing team spirit and positivity to every project.

Experience

Base39 Remote - São Paulo, São Paulo, Brazil
Founder Team - Senior Software Engineer Feb 2024 - Present

- Reduced report creation time **by 75%** by changing the creation flow from a table to a simple search input.
- **Context:** Base39 is a startup of financial AI analysis, enabling companies to analyze their data and produce concise, unbiased reports. By integrating online data, client data, and internal databases, we drive enhanced performance. As a member of founding team, I play a pivotal role in bringing ideas to life, with a particular focus on Frontend development and User Experience design.

Paketá Remote - São Paulo, São Paulo, Brazil
Senior Software Engineer Aug 2022 - Feb 2024

- Increased credit loan review time **by 4x** through the implementation of real-time notifications.
- Minimized duplicate payments **in 99%** by changing invoice integrations.
- Reduced loan analysis costs **by 96%** creating an AI chatbot.
- **Context:** Oversee the Backoffice, Enduser, and HR platforms, which serve thousands of users daily and form the backbone of the business. Collaborate closely with design, marketing, product, financial, and operations teams to consistently enhance the platforms and ensure UX/UI validation.

Paketá Remote - São Paulo, São Paulo, Brazil
Software Engineer / Enduser and Backoffice Plataforms Tribe Jul 2021 - Aug 2022

- Saved **over 100x** in infrastructure costs by migrating services to serverless.
- Accelerated credit loan request flow **by 75%** through refined UX/UI performance.
- Achieved significant **storage savings** by compressing images to 10% of their original size and automating TTL for unused images.
- **Context:** My role is to keep Backoffice platform and the Enduser platform that seamlessly supports thousands of users daily in accessing and applying for credit. I collaborate closely with marketing, design, and product teams to enhance product offerings and optimize user workflows.

Paketá Remote - São Paulo, São Paulo, Brazil
Software engineer / Backoffice Platform Tribe Aug 2020 - Jul 2021

- Improved loan analysts' productivity **by 50%** by reorganizing data on interfaces and minimizing clicks.
- Increased development time **by 2x** with a centralized library, ensuring code reuse across projects.
- **Context:** Paketá is a fintech focused on payroll credit, providing customized financial solutions for employees. My role involves work on a Backoffice platform for B2B operations, empowering companies to effectively manage their data and workforce.

Essência Digital Jundiaí, São Paulo, Brazil
Software Engineer Jan 2020 - Jul 2020

- Boosted forum content creators' productivity **by 60%** through improved data management and organization.
- **Doubled employees efficiency** in accessing data on the forum by revamping and streamlining the user interface.
- **Context:** Steered a migration initiative with GOL Airlines and Teleperformance, aimed at developing a forum

platform for LATAM employees. In this role, I orchestrated the migration planning, dived into the existing legacy application, and crafted a new solution that delivered enhanced performance, a superior user experience, multilingual support, and swift operations to optimize job efficiency.

Essência Digital

Junior Software engineer

Jundiaí, São Paulo, Brazil

Jul 2019 - Jan 2020

- Reduced initial e-commerce layout creation time **by 90%** by creating a style template.
- Increased guest registration efficiency **by 50%** in a building access control application by revamping the layout, and adding a search feature for registered guests.
- **Context:** Essencial Digital is a consulting company that develops applications accessed daily by hundreds of users across varied sectors such as e-commerce, music, building security, and medium-sized businesses. My role involves designing and maintaining applications as a member of the Frontend team.

Optera

Junior software engineer

Jundiaí, São Paulo, Brazil

Jul 2018 - Aug 2019

- Crafted a template design that made image creation **3x faster** using consistent image patterns.
- Decreased ERP tax generation time **by 30%** using a redesigned user interface.
- **Context:** Optera is a consulting company that develops applications for various sectors, including marketing, mechanical engineering, healthcare, civil construction, internet services, and small businesses. Additionally, Optera creates its own products, such as an ERP system and a platform for internet plan comparisons. My role is to design and sustain these applications as part of the software development team.

Education

Faculdade de Tecnologia de São Paulo - FATEC-SP

Information technology management

Curso Superior de Tecnologia (CST)

Dec 2016 - Dec 2018
